The Tuberculosis Assessment is required for all Health Professions Students.

Additional students may be required to complete this form based on Student Health and Wellness guidance after review of TB Screening Questionnaire.

Directions: All students MUST complete only ONE section below: A, B, or C.

Section A: Students who do not have a history of TB disease or LTBI (Latent Tuberculosis Infection)

Section B: Students who have a history of a positive Tuberculosis skin Test (TST) $\geq$ 10mm or a positive Interferon Gamma Release Assay (IGRA)

Section C: Students who have a history of active tuberculosis infection (TB disease)

Section A: Complete this section if no history of TB disease or LTBI (Latent Tuberculosis Infection).				
Current TB Symptom Survey (required): Coughing up blood, chest pain, bad cough > 3 weeks, fever, night sweats, unexplained weight loss, weakness/ fatigue				☐ Negative ☐ Positive
TB Testing (required): IGRA or TST acceptable; IGRA preferred if history of BCG vaccine. All testing must be done after the specified date: Fall entry: 3/1/2025; Spring entry: 7/1/2025.				
IGRA Date Obtained:	Result: ☐ Negative ☐ Positive		Report must be attached.	
TST: TST must be read 48–72 hours following placement. Two-step required for health professions students only. If 1st TST negative, 2nd TST is placed on the opposite forearm 7-21 days after initial negative results and the results are interpreted in the standard fashion.				
Test 1	Date placed:	Date read:	Result: _____ mm	☐ Negative ☐ Positive
Test 2	Date placed:	Date read:	Result: _____ mm	☐ Negative ☐ Positive
Chest x-ray (required if IGRA or TST positive): X-ray must be done after the specified date: Fall entry: 3/1/2025; Spring entry: 7/1/2025.				
Date of chest x-ray:	Result: ☐ Normal ☐ Abnormal		Report must be attached.	
TB Risk Assessment (required):				
Temporary or permanent residence of $\geq$ 1 month in a country with a high TB rate (any country other than the US, Canada, Australia, New Zealand, and those in Northern Europe or Western Europe)				☐ Yes ☐ No
Current or planned immunosuppression (including HIV infection, organ transplant recipient, treatment with TNF-alpha antagonist, chronic steroids, or other immunosuppressive medication)				☐ Yes ☐ No
Close contact with someone who has infectious TB disease since the last TB test				☐ Yes ☐ No
Treatment for LTBI initiated? ☐ Yes ☐ No If treatment is not initiated, attach documentation of LTBI counseling.	If treatment is initiated, list medications:		Planned treatment duration:	

Student Name:

DOB: / /

University ID #:

Section B: Complete this section if history of a positive TST (PPD) $\geq$ 10mm or a positive IGRA or LTBI (Latent Tuberculosis Infection)

Date of prior positive IGRA:	☐ QFT-GIT ☐ T-Spot ☐ Other	
Date of prior positive TST:	Result: _____ mm	
Date of chest x-ray (must be after the specified date: Fall 3/1/25; Spring 7/1/25):	Result: ☐ Normal ☐ Abnormal	Report must be attached.
Current TB Symptom Survey: Coughing up blood, chest pain, bad cough > 3 weeks, fever, night sweats, unexplained weight loss, weakness/ fatigue	☐ Negative ☐ Positive (attach documentation of medical evaluation including chest x-ray)	
Treated for LTBI? ☐ Yes ☐ No If treatment is not initiated, attach documentation of LTBI counseling.	If treated, list medications:	Total duration of treatment: _____ months

Section C: Complete this section if history of active tuberculosis infection (TB disease)

Date of Diagnosis:	Date treatment completed:
Date of chest x-ray (must be after the specified date: Fall 3/1/25; Spring 7/1/25):	Result: ☐ Normal ☐ Abnormal
Current TB Symptom Survey: Coughing up blood, chest pain, bad cough > 3 weeks, fever, night sweats, unexplained weight loss, weakness/ fatigue	☐ Negative ☐ Positive (attach documentation of medical evaluation including chest x-ray)
